

My father was detected with a large liver tumour for which we consulted Dr. Nagarajan. Dr. Nagarajan was extremely approachable and explained the nature of the tumour in an easy to understand language. He exhibited a lot of confidence and positivity throughout the course of the consultation which helped my father to keep a positive frame of mind. He was able to successfully remove the tumour through a supra-major surgery that lasted for almost 5 hrs. Even in the post-surgery phase he and his team were always available and guided us well through the post-operative procedure.

A big thanks to Dr. Nagarajan and his team. Highly recommend Dr Nagarajan
