

24/06/2021.

My mother S.N. was diagnosed with Colon Cancer in the month of Nov. 2020. We were devastated with the news and was recommended to meet Dr. Ganesh Nagarajan by our family doctor.

I remember meeting him the first time and the way he made us comfortable about the disease. The fear of the word CANCER was removed from our mind. Mummy was operated in November '20

It was a Robotic surgery. Mummy did not had any major issue and the family <sup>was</sup> immediately <sup>put</sup> at ease after the surgery. Dr. Nagarajan has excellent expertise in his field and the best part is that the patient is made very comfortable before and after the surgery.

I would personally recommend him to each and every person (~~who~~ <sup>no one</sup> should not) with any such problems.

We as a family are very grateful to Dr. Nagarajan & his team for bringing us out of the major health issue.

GOD BLESS HIM.

Thanks

(DAUGHTER)
